DEVELOPMENT AND COMMERCIALIZATION OF GREEN TECHNOLOGY

The conference will address the practical engineering application (mechanical, electrical, energy and power engineering, industrial engineering, and chemical engineering).

Topic of interest include, but are not limited to the following:

- Smart Grid Technology
- Renewable Energy
- Electric Vehicle
- Conversion Devices and Energy Saving
- Technology
- Nanogrids System for Rural and Isolated Area
- Industry 4.0
- AI and Soft Computing
- IoT and Big Data
- Robotic and Intelligent Control
- Network and Communication System
- Bio Energy and Bio Fuels
- Waste to Energy
- Biomass Conversion Technologies
- Bioenergy in Integrated Energy System
- Biogas
- Microwave Thermal Processing
- Environmental Impacts of Bioenergy System
- Electrochemical Process and Super-capacitors
- Carbon, graphene, oxides, composites
- Smart Materials
- Rare Earth Elements for Storage, Sensor, CO2 Capture
- Lithium Ion Batteries
- Metal Hydride Batteries
- Polymer technology
- Sustainable Materials
- Capacitive Energy Storage System
- Computational Modelling Of Innovative Materials For Energy Storage and Conversion
- Electrolytes; Oxygen Ion, Proton & Mixed Conductors
- Electrolysis / Electrolysers
- Metal Hydrides For Thermal Energy Storage
- Synthesis Of Novel Materials For Hydrogen Production And Storage
- Fundamental Properites Of Metal-Hydrogen Systems
- Green and Smart Manufacturing
- Environmental Engineering Innovation
- Green and Sustainable Manufacturing
- Green and Sustainable Logistics
- Green and Sustainable Supply Chain
- Technology Commercialization for Green Energy
- Quality Engineering and Assurance for Green Technology
- Product Design and Standardization for Green Technology
- Industrial Ergonomics to Support Green Technology
- Global Network and IT support in Green Technology Development
